Year 1

What happens in Year 1?

Curriculum

This term our topic is 'Winter Woodland'. This topic focuses on nature and the changes that happen during autumn and winter. This topic explores aspects of Science and Geography with some elements of art too.

In our music lessons this term, we are going to be focusing on learning the songs for Christmas assembly.

Reading

Children's reading books will be changed on a **Monday** and again on a **Thursday** providing the children have read it 3 times, if not, it will be changed on the Monday. To help promote a level of independence in year 1, we ask children to put their book in the tray when it needs changing. If you find that your child's book has not been changed, please remind them to make sure that they are putting it in the tray on the selected days.

Year 1's library sessions are on a **Tuesday**— Please ensure that any previously borrowed books are returned to ensure your child can take out a new one.

Please can we also ask that children's reading books are in school everyday.

Home Learning

We ask that you share your child's reading book with them at least three times a week. Re-reading books will help children to become fluent readers. It is really helpful to look at the common exception words in the front of their reading record too.

Please also continue to access Numbots at home, logins for this can be found at the front of your child's reading record. You can also find your child's purple mash login in their reading record, in school we use purple mash for our computing lessons and children can access a variety of activities on there.

PE days

Our PE day is **Tuesday.** Please ensure that earrings are removed for these lessons.

Please can we ask that children's items are named as it makes finding lost items much easier to find.

Children need a named water bottle and their reading book with them everyday.
